Mahakrishan Lohar

Lead UI/UX Designer

Ahmedabad, India mahakrishan21@gmail.com github.com/mahakrishan21

PROFILE

10+ years designing websites, dashboards and mobile apps for agency and enterprise clients. Today I lead client design at E2M and build the team's tools myself: AI agents, Claude Code workflows and Figma plugins, written through AI-assisted development (vibe coding). I work best between client, designers and developers, turning a messy brief into something that works.

EXPERIENCE

Lead UI/UX Designer / E2M Solutions, Ahmedabad `2021 – now`

- Built the team's AI design tools: a Figma maintenance agent and Figma plugins.
- Created a Claude Code workflow that takes a client brief through concepts, revisions and WordPress build.
- Plan the team's work and run design reviews, improving billability.
- Lead UI/UX for websites, portals and dashboards, from research to developer handoff.
- Own design communication with clients.

Senior UI Designer / Silver Touch Technologies, Ahmedabad `2019 – 2021`

- Designed web and mobile app interfaces, and animated interactions in Principle and After Effects so developers saw motion and behavior before build.

UI Designer / Multicore Technologies, Ahmedabad `2017 – 2019`

- Designed iOS, Android and web interfaces, plus brand identities and motion graphics.

UI and Graphic Designer / Blurbpoint Media, Ahmedabad `2015 – 2017`

- Designed website interfaces and marketing creatives; maintained sites in HTML, CSS and WordPress.

SELECTED BUILDS

Design Studio 11 AI agents take a client brief to a deploy-ready site, with designer approvals.
`Claude Code plugin, Playwright`

File Keeper AI agents for client revisions, responsive frames, audits and QA in Figma.
`Claude Code plugin, Figma`

Prototype Link Generator `Figma plugin` Fit-Width prototype links for every selected frame at once.
`Figma Plugin API`

Canva-Gen Canva production assistant: client brief to on-brand designs, QA, approval and export.
`Claude Code plugin, Canva connector, Python`
